DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-2, 4, 41 and 59 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the amendments to claim 1, it is noted that it is unclear as to what the claim requires regarding the "two rigid portions." In referring to applicant's own drawings Figs. 4 and 5, the claim requires that the flexible member has two rigid portions in line 12 of claim 1. The two rigid portions are at a joint component. A few lines later the joint component is claimed to be an elastic member that secures rigid portions together. In Fig. 4, the "rigid" portions could be 402 and 410 forming a "joint" and the flexible member 418. However, as claimed it appears that if a flexible member 418 now has "two rigid portions" then this is NEW MATTER, not supported. On the other hand, if a joint component is being claimed as in Fig. 5, then it has the two "rigid" portions (402 and 410) in side and the flexible member surrounding it, and the entire entity is a flexible joint component. In any case, it is unclear as to what applicant claims, as one interpretation may qualify as new matter, while the other cannot be both rigid and elastic as claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-12, 50 and 58 are rejected under 35 U.S.C. 102(b) as being anticipated by Martin (US Patent 5,733,284). Martin discloses a prosthetic device for spinal implantation having a means for providing one or more flexible posterior devices and having one or more biocompatible attachment devices (see Fig. 1). It is noted that Martin discloses that the device is capable because of its attachment mechanisms to connect to various parts of the vertbrae (Col. 2, lines 18-25). Martin also disclose a means for adapting the one or more posterior device because the rods, for example, are flexible and can be realigned as necessary (Col. 3, lines 62-67). Additionally, coupling means (5a) allows up to four degrees of freedom of rotation, thus depending on where the apparatus is connected, it is capable of providing flexible movement, and assisting the facet joint. In addition to the rods being flexible and a part of the joint area (5a/8) the device also has springs to assist in the means for adapting the device to help assist with the motion of the facet joint.

Allowable Subject Matter

Claims 42-48 and 52-57 and 60 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 1-2, 4, 8-12, 41, 50 and 58-59 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
